

Methodist Ambulatory Surgical Services

FAST FACTS

The Methodist Healthcare family of facilities includes an ambulatory surgery hospital and two ambulatory surgery centers. The ambulatory surgery facilities provide a cost-effective and convenient environment for patients needing surgery but who do not require a prolonged hospital stay. Patients who elect to have surgery in an ambulatory setting arrive on the day of the procedure, have surgery in a fully-equipped operating room, spend an appropriate amount of time under the care of experienced nursing staff and return to the comfort of their own home to complete the recovery process.

The ambulatory surgery facilities of Methodist Healthcare provide services in a variety of surgical specialties including gynecology, podiatry, ophthalmology, orthopedics, oral surgery, general surgery, pain management, urology, cosmetic surgery and surgeries involving the ears, nose and throat. With an outstanding reputation and superior customer satisfaction ratings, the following facilities offer the same consistent, high quality of care the community expects from Methodist Healthcare.

Service Highlights

Methodist Ambulatory Surgery Hospital
9150 Huebner, Suite 100
San Antonio, Texas 78240
(210) 575-5000

Specializing in outpatient and elective inpatient surgery, Methodist Ambulatory Surgery Hospital-Northwest offers an atmosphere and environment that promotes wellness and rapid recovery. With nine fully-equipped operating rooms, this 31-bed facility provides patients with the latest technology and all the ancillary services associated with larger, full-service hospitals.

Methodist Ambulatory Surgery Center – Medical Center
4411 Medical Drive, Suite 200
San Antonio, Texas 78229
(210) 575-4584
